EXAMINER'S AMENDMENT

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 12/13/05 has been entered.

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Roland E. Long, Jr. on 03/06/06.

The application has been amended as follows:

In the claims

In claim 7, line 8, "the surface" has been changed to -- a surface of the first substrate -- ; and

line 11, "on a" has been changed to -- on the --.

In claim 13, line 7, "said surface" has been changed to -- a surface of the first substrate --; and

line 8, "on a" has been changed to -- on the --.

Reasons for Allowance

The following is an examiner's statement of reasons for allowance:

Claim 1 is allowed because none of the prior art of record discloses or suggests a method of manufacturing a liquid crystal display having the combination of the steps of performing an alignment between said first and second substrates while pressing said second substrate on a surface of said first substrate on which said liquid crystal is dropped with a predetermined pressure in a vacuum chamber where the internal pressure is below a predetermined value; releasing said vacuum chamber into atmospheric pressure wherein said alignment between said first and second substrates comprises sliding said first substrate in an axial direction parallel to the surface of the first substrate. Claims 2-6 and 12 are also allowed since they depend on claim 1.

Claims 7 and 8-11 are allowed for the same reasons set forth in the Office Actions mailed 3/23/05 and 10/18/05.

Claim 13 is allowed because none of the prior art of record discloses or suggests a method of manufacturing a liquid crystal display having the combination of the steps of performing an alignment between said first and second substrates, by sliding said first substrate in a circumferential direction having an axis vertical to a surface of the first substrate as a rotating axis, while pressing said second substrate on the surface of said first substrate on which said liquid crystal is dropped with a predetermined pressure in a vacuum chamber where the internal pressure is below a predetermined value; and releasing said vacuum chamber into atmospheric pressure.
